

VACUUM CLEANER

REM POWER HC 2000 PLUS

Order No.: 28200011

EAN code: 3831081007841

REM POWER HC 2000 PLUS – if you want fast dry cleaning, reliable wet extraction, and thorough deep cleaning of textiles with a single device.

REM POWER HC 2000 PLUS is the right choice if you are looking for a device for multiple tasks: **dry vacuuming**, **wet vacuuming**, and **deep cleaning of textiles with spraying and extraction**.

It was developed for users who expect powerful performance, practical application, and extensive features—both at home and in the workshop, garage, or car wash.

The powerful **1400 W motor** ensures efficient removal of dust, dirt, and debris, while the wet vacuum function also reliably removes spilled liquids. If you need a more thorough clean, use the spray function: first moisten the surface with a cleaning solution, then the appliance **vacuums** the dirt out of the fabric together with the **liquid**.

This is ideal for **carpets**, **upholstered furniture**, **car seats**, **mattresses**, and other upholstered surfaces where dirt becomes embedded deeper in the fibers.

A major advantage of the HC 2000 PLUS model is its robust **20-liter stainless steel container**, which is shock-resistant and suitable for more demanding applications. The device also allows the use of a dust bag for dry vacuuming, which makes emptying and maintenance easier.

The **HEPA filter** ensures cleaner air and better filtration, which is particularly advantageous for fine dust. A comprehensive set of accessories covering practically all cleaning scenarios ensures an uncompromising user experience. The vacuum cleaner also has a **blow-out function**, for example, for inflating air mattresses.

Particularly noteworthy are the two stainless steel extension tubes, which are more robust and durable than conventional plastic solutions, and the flexible hose with detergent dispenser for easy spraying. The **4.5 m long cable** gives you a good range when working, and at **7 kg**, the device is light enough to be easily transported and used in multiple rooms.

TECHNICAL DATA

POWER SUPPLY

Mains voltage	230 V / 50 Hz
---------------	---------------

PERFORMANCE

Motor power	1400W
-------------	-------

DESCRIPTION

Dust tank volume	20 l
Cable length	4,5 m

GENERAL

Dimension (L × W × H)	380 × 330 × 500 mm
Protection class	IPX4
Weight	7,2 kg

ACCESSORIES

1. Flexible suction hose with spray gun
2. 2 INOX extension tubes
3. HEPA filter
4. Wide washing brush (for carpets)
5. Narrow washing brush (for seating furniture, etc.)
6. Round brush
7. Brush for dry/wet vacuuming of floors
8. Flat nozzle
9. Dust bag
